

Proof of Participation in the Spring 2018 Illinois Institute of Technology Student Ethics Committee

April 30, 2018

Dear Colleague:

This letter confirms that Mohsen Dirbaz acted as a workshop facilitator in the Illinois Institute of Technology's Student Ethics Committee from January-April of 2018. The committee consisted of graduate students from the Department of Physics and the Department of Chemical Engineering. The committee met six times during the spring 2018 semester as part of the National Science Foundation - funded project entitled "A Bottom-Up Approach to Building a Culture of Responsible Research and Practice in STEM" (Award Number 1635661). In this project, Mr. Dirbaz worked closely with the project team to shape the workshops to the needs of the chemical engineering participants, and was an effective leader in developing the ethical guidelines

As a workshop facilitator, Mohsen Dirbaz helped organize and lead a series of workshops focused on developing discipline and laboratory specific ethical guidelines aimed at providing support in handling ethical issues that frequently arise in research groups. In these workshops, Mr. Dirbaz provided insight into how ethical issues arise in chemical engineering, and how these issues have been effectively avoided or handled in the past. As an excellent workshop facilitator, Mr. Dirbaz helped develop a set of guidelines that addressed expectations for graduate students working in chemical engineering research groups that will be used to orient new members of the lab in the future.

Mohsen Dirbaz's participation in the Student Ethics Committee was an integral part of the success of this project, and his feedback has been extremely helpful in shaping how this project will move forward in the future.

If you have any questions about Mr. Dirbaz's participation in the Illinois Tech Student Ethics Committee, please feel free to contact me at ehildt@iit.edu.

Sincerely,

Elisabeth Hildt
